I feel crematories are accessory uses to funeral homes, especially when limited to their own customers. Thanks!

Subject: Crematories

Scott,

Received a call from WNC Air Quality who has received an application from Williams Funeral Home on Tunnel Road, for a crematory. The crematory will be housed in the existing funeral home and will only serve their customers. The property is split zoned HB/ RS-4. The funeral home is located in the HB part. Just wanted to make sure we are ok with saying the crematory is an accessory use to the funeral home. In the past Gerald had some concerns with crematories as stand alone uses in any district besides light industrial/ industrial areas because of the fumes and gases released during the burn.

*restricted to that
facility's customers
can't take customers from
other facilities owned by
same owner.*

*Williams is corporately owned -
they want to use crematory on
Tunnel Road for all owned facilities.*
